

At Blue Orchid, we pride ourselves on providing practical and professional business advice and guidance to ensure our clients get the right support at the right time, no matter what stage they are in their business journey.

Our team of expert business advisors are business owners or self-employed themselves, therefore they draw on their own experiences of starting a new business or running and growing a business. They support and mentor our clients, helping them understand the benefits of business start-up or growth, as well as contingency planning for some of the potential pitfalls they may face.

We constantly strive to provide a service that is actually needed by our clients, rather than assuming what they require. We continually evaluate our services to ensure we tailor our approach to supporting our clients.

Whether clients would benefit from one-to-one business advice or grants to start or grow their business, Blue Orchid will strive to find the right, most effective solutions.
