

Jessica Alce

Renewable Energy Process Engineer for Severn Trent Green Power (STGP). Graduated University of Sheffield 2016 with a first-class master's degree in Chemical Process Engineering and Renewable energy. I joined Severn Trent in 2016 as a graduate on the technical engineering leadership scheme. I transitioned to the renewable energy arm of the business STGP in 2018. I have been heavily involved in the build, commissioning and process optimisation of the Derby Food Waste Anaerobic Digestion Plant that includes technology that has been used for the first time in the food waste industry.
