

Suzanna Jones

I have a B.A.Sc. in Global Sustainable Development from the University of Warwick and I'm now pursuing an MSc in Sustainability and Environmental Management at Coventry University. I am the new Sustainability Officer at SCC looking at how to improve our sustainability performance, reduce carbon footprint, increase student engagement and 'green' the curriculum, source food and products responsibly and much more. I am also writing an ESG Strategy Report for a Scottish Natural Gas company who are looking to develop technologies in the Net-Zero space; helping reduce greenhouse gas emissions through Carbon Capture and Storage, use of Hydrogen and Electrification.
