

Tim Armitage

Tim Armitage is an Associate Director of Arup in Solihull, with considerable experience of leading and contributing to complex multi-stakeholder projects within a range of domains that include the marine, automotive, railway and built environments.

Tim has managed projects related to climate change and climate change adaptation, where he has helped to develop strategies to improve operational resilience in the face of change and uncertainty. Tim is a recognised expert in the area of zero-emission mobility and he has led and contributed to several projects in this area, in the UK, in Hong Kong, in Dubai and currently in Vietnam.
