

## **Environmental initiative**

We care about neighbourhoods, green spaces and parks - where you meet friends and family, where you relax, where you get active - the places that mean something to you and your wellbeing

## **Supports communities**

We support individuals of all ages, voluntary groups, schools, colleges and businesses

## **Making a difference**

We help people look after where they live and encourage them to seek out new opportunities to make positive change

# How can we support you?

We listen to people and their opinions, and together help find solutions to issues that matter

We empower you to take ownership for the area where you live and the places that you love

We can provide advice to help you get your idea off the ground, giving you the tools you need to make a difference

We promote projects and campaigns that bring people together to make collective change

We can help you further your skills and networks, putting you in touch with local businesses and people with similar interests

We recognise how important green spaces are to wellbeing and want to help you feel good in a clean and safe environment

# How do I influence change?

Get involved in litter picking with your family and friends next time you visit your local park - we can provide free kit!

Tell us your ideas on how we can improve council owned green spaces - are there any facilities or areas that could be improved?

Volunteer with your local community group - meet new people and take part in projects - no local group? We can help you start one!

Share your passion with your social networks, raise awareness of why green spaces and parks are so important.

Don't be afraid to take action, be creative, start a movement, let your voice be heard - your opinion really matters!

Keep learning and researching - understand the importance of sustainability and how that links to our green spaces in the future

# How will I benefit when thinking about my future?

Improve your CV for future employment or diversify your applications for further/higher education courses

Learn more about yourself, what motivates you, and whether a career in sustainability could be for you

Gain practical, hands-on experience and have the opportunity to learn new skills which help shape future career choices

Meet with like-minded people, build friendships and professional connections which could support you in the future
