

Solihull's Net Zero Action Plan Update

Ann-Marie Attfield

Net Zero Action Plan Recap

On 11th November 2022 the Council approved Solihull's Net Zero Action Plan (NZAP)

The plan is a key part of our response to the climate emergency it identifies the actions that can help us in our journey to net zero.

The Plan Contains:

- **8** Action Areas
- **54** Goals
- **203** Actions

It covers everything from implementation of technology to a wide range of behaviour change and engagement actions

Quick Facts 2021/2022

In 2020 15%
Reduction in
GHG emissions
across the
Borough

Almost halved
Council's
Operational
Emissions
since 2017/
2018

32% Non
Domestic
Buildings at
DEC C or higher

39 Schools

9.5 MW
installed
capacity
renewables

56 EV Charge
points an
increase of 50

51,000 trees
planted –
Planting our
Future

What's Next?

Whilst we have made great progress in many areas of the NZAP, we need to continue to refine our approach to ensure we meet our net zero aims and flex to existing challenges like energy price volatility and cost of living crisis

Over the coming months focus areas will include:

Funding and financing of net zero

Focussing on engagement and behaviour change

Delivering more of our high impact actions within the NZAP

Energy system actions

Thank you
